Professional Summary

Aspiring Software Engineer with strong foundations in Python, Java, and SQL, along with experience in building data-driven applications and dashboards. Skilled in problem solving, data processing, and developing efficient, scalable solutions using modern tools and technologies. Passionate about writing clean, secure code and contributing to collaborative, high-impact software development environments.

Skills

- **Programming Languages:** Python, Java, SQL
- **Core Concepts:** Data Structures, Object-Oriented Programming (OOP), DBMS
- **Data & Analytics:** Pandas, NumPy, Matplotlib, Seaborn, Data Cleaning, EDA
- **Data Visualization:** Power BI (DAX), Tableau, Microsoft Excel
- **Databases:** MySQL, Oracle
- **Tools & Technologies:** Git, GitHub

Coding Profiles

- Solved 150+ problems on LeetCode (Arrays, Strings, Recursion), Strong problem-solving skills with focus on logic building and optimization

Work Experience

Data Analyst Intern – Plasmid Innovation

Aug 2025 – Oct 2025

Dataview Analytics | Tools : Python, Excel, SQL, Power BI

- Engineered efficient data handling logic using SQL to manage and **process large-scale datasets (90,000+ records)**, ensuring structured storage and fast retrieval.
- **Improved data accuracy by ~30%** through validation checks, deduplication, and standardization techniques.
- Improved overall system efficiency by applying modular programming practices and optimizing data processing logic.

PROJECTS

Real-Time Log Monitoring & Alert System (Software Development Project)

Technologies: Python, File Handling, Data Structures

Sep 2025 – Oct2025

- Designed and developed a real-time log monitoring system to process application logs, detect anomalies, and **track system behavior efficiently**.
- Implemented pattern-matching logic to identify error keywords, unusual activity, and repeated failures from large log files and **maintained code using Git version control**.
- Addressed challenges such as duplicate log entries, missing data, and **inconsistent formats through validation and filtering techniques**.

Library Management System with Search Optimization (Software Development Project)

Technologies: Python,SQL

Nov 2025 – Dec 2025

- Designed and developed a library management system to handle book records, user data, **issue/return operations, and availability tracking**.
- Structured and managed relational database tables using SQL **to ensure data integrity, consistency, and scalability** and maintained code using Git version control.
- Solved challenges related to duplicate records, invalid entries, and **data synchronization across multiple operations**.

Certifications

- | | |
|---|-------------------------|
| • NPTEL – Introduction to Internet of Things (2025) | NPTEL25CS147S765301685 |
| • NPTEL – Management Information System (2025) | NPTEL25MG133S1165301862 |
| • Oracle Java Certification | 100871866OCPJSE11 |
| • Oracle DBMS Certification (91%) | 100878602OCSSQL12C |

Education

Bachelor of Technology (B.Tech) – Computer Science and Engineering(AI&DS)

Graduated: 2027

Saveetha School of Engineering College, Chennai, Tamil Nadu

CGPA: 9.3 / 10

Senior Secondary (INTER):-MPC

Graduated:2023

Narayana Junior College , Nellore

PERCENTAGE: 96.10
